

14 new and upcoming hotels for Miami

📅 Sunday, January 15, 2017 by BusinessTraveller

Miami's hotel scene continues to thrive; the city's hotel pipeline has thousands of rooms coming online over the next few years. Some projects breathe new life into small, historic Art Deco and Art Moderne buildings. Others are part of vast mixed-use complexes with residential components, a portion of the market that is having a major comeback.

Development is spread across town, both along the beaches (South Beach and further up) and in districts such as Brickell and its massive \$1 billion+ Brickell City Centre project. We take a look at some (very) new openings and a number of hotels coming soon.

The Betsy South Beach

In time for its 75th birthday this year, **The Betsy South Beach** wrapped up two years of renovations that saw the hotel expand into the Art Deco Carlton Hotel next door. Now at 130 rooms – more than double the original 61 – one of the standout additions is a second pool on a 3,200 sq ft rooftop deck with ocean views. The new wing also has a library and conservatory with espresso and wine bar.
